

4 Color Process

aka CMYK (Cyan, Magenta, Yellow, Black)

4 Color Process is a great way to achieve a wide color gamut as well as photo quality on a screened print. We produce quality 4 color process prints on a variety of materials at up to 120dpi, depending on the application. 4 color process allows us to achieve brilliant colors and limit your colors (if too many colors is not affordable) at a cost effective price. Please let us know if 4 color process matches your printing needs.
